

Thank you for purchasing this course

This course is a part of the **Modern Data Engineering** series at DataVidhya that we planning to launch.

Modern Data Engineering series will contain multiple courses and will help you to become a Data Engineer!

Here is the rough plan:

- Python for Data Engineering -
 - <https://datavidhya.com/courses/python>
 - USE CODE - **PY20** to avail 20% of Python for Data Engineering course
- SQL for Data Engineering
 - <https://datavidhya.com/courses/sqldata>
 - USE CODE - **SQL20** to avail 20% of SQL for Data Engineering course
- Data Warehouse for Data Engineers with Snowflake (**You are here**)
- Big Data Processing - Building Batch Pipeline (Apache Spark & Other tools)
- Big Data Processing - Building Streaming Pipeline (Apache Kafka & Other tools)
- Workflow Management (Airflow/Prefect/Mage)
- Data Engineering on Cloud (AWS/GCP/Azure)
- Data Engineering Real-World Case Studies

Interview Prep, Building Portfolio, and other guides with these.

Data Engineering is a big field and it takes time to learn all of these, so I will be going step by step and helping you with this journey.

My plan is to build all of these in the next 6-8 months and make you job-ready!

Hope this gives better clarity and if you have questions please write on info@datawithdarshil.com

Thank You,
Darshil
